01
Introduction

The concept of education is continually evolving. In recent years, the treatment of education as an industry, with contents taught by the teacher in standardized manner and a uniform set of skills demanded of all students, has been questioned. This vision has shifted to a perspective where the unique attributes of each student are addressed, approaching learning and teaching in the most responsible way possible. In view of the new educational contexts in continuous development, the role of sports educators who are already prepared for these changes is essential.

Anticipate the latest changes in the education sector and stay ahead of the curve by enrolling in this specialized program"

The most outstanding early childhood educators are those who are able to adapt to new trends in education. In the area of sports, the methodology is also in continuous change, with aspects such as working on self-esteem through physical exercise being more highly valued.

In view of such a complex and constantly evolving scenario, sports and educational centers are increasingly demanding a teaching staff that is more aware of this new situation, with specialist studies to know how to deal with it. Those who understand education as a service to the freedom and integral development of each human being will have an advantage over those who see it from the archaic perspective of mass industry.

Aware of this problem, TECH has developed this Postgraduate Certificate in Personalized Early Childhood Education to prepare its students for a fluctuating educational environment. Topics such as motivation, metacognitive learning or the process of becoming a teacher, among other topics of special interest to all children's sports educators, are discussed in depth.

Thus, the student is guaranteed to obtain the necessary competencies and skills to apply the latest techniques in early childhood education to their work methodology, as well as learning to study the surrounding environment in order to personalize their exercises more effectively.

This **Postgraduate Certificate in Personalized Early Childhood Education** contains the most complete and up-to-date scientific program on the market. The most important features include:

- The study of the concept of the teacher and their influential role in the development of the infant

- Reflection on the most appropriate learning methodology to help children to develop both physically and emotionally

- The most innovative methodology and practices with respect to early childhood education

- Practical exercises where the students undertake self-assessment to improve learning, as well as activities at different skill levels

- Guidance on how to become an effective sports teacher and how to identify what characterizes such effectiveness

- Content that is accessible from any fixed or portable device with an Internet connection

By becoming an expert in Personalized Early Childhood Education you will be prepared to make the leap in your career"

> *Learn everything you need to be an effective sports teacher and broaden your professional horizons with this comprehensive program.*

" *The starting pistol for better working and educational prospects is about to be fired. Don't get left behind and enroll on this Postgraduate Certificate in Personalized Early Childhood Education"*

> *The key to an infant's healthy development lies in the ability of their physical education teacher. Give your students the opportunity to have the top coach they want.*

The program's teaching staff includes professionals from the sector who pour their work experience into this Postgraduate Certificate, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive learning designed for real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to resolve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

02
Objectives

The physical evolution of children is an issue of vital importance, hence the frequent appearance of new methodologies and working practices that are adapted to the needs of each child. That is why TECH has developed the Postgraduate Certificate in Personalized Early Childhood Education with the objective of providing its students with all the necessary tools and knowledge to stay one step ahead of the latest educational trends.

"

You have the drive and enthusiasm it takes to be a teacher of children's sports. TECH gives you the tools to achieve your career goals"

General Objectives

- Build relevant skills for adaptation to the new reality of early childhood education
- Gain in-depth knowledge of the fundamentals of education and how it influences children
- Focus on student motivation as a key consideration for the sports teacher
- Cover everything surrounding the educational process, from the center itself to the child's own family
- Explore the importance of family influence on the healthy growth of the child
- Encourage the search for the most effective educational method for each teacher

Specific Objectives

- Acquire the necessary tools for reflection
- Consider professional and intellectual concerns in order to learn to be good professionals
- Know the different pedagogical foundations of Education
- Identify the different learning opportunities in personalized education
- Elaborate the necessary tools for proper organization of the center
- Internalize teacher development for an effective educational response

You will be a teacher who is ready to face any situation with this Postgraduate Certificate in Personalized Early Childhood Education"

03

Structure and Content

TECH has chosen the most innovative experts in the field of education for the creation of this Postgraduate Certificate, guaranteeing the student access to the highest quality content on the subject. With a clear and precise structure, the learning process is also made easier, with any doubts regarding the syllabus resolved in a concise manner.

"
TECH selects the best in their field so that you too can be the best sports educator possible"

Module 1. Personalized Education. Anthropological, Philosophical, and Psychological Foundations

You are about to give your career a major boost. Do not hesitate and specialize in Personalized Early Childhood Education"

04
Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

"

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

"

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

"

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method is the most widely used learning system in the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH, you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

01 learning from evidence

02 relearning from evidence

03 testing

04 learning from an expert

05 neurocognitive context dependent learning

06 Von-Restorff effect

07 case based learning through storytelling

08 competencies testing (retesting)

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically. With this methodology, we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization that we are experiencing.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

Students will complete a selection of the best case studies chosen specifically for this situation. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

05

Certificate

The Postgraduate Certificate in Personalized Early Childhood Education guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork"

This **Postgraduate Certificate** in Personalized Early Childhood Education contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
