Introduction

The determination of the efficacy of psychological interventions in the field of sports is a task that has been widely followed in recent years. Sports psychology carries with it the search for performance, one of its fundamental objectives. The role of the sports psychologist is very important both on and off the field, in preparation for competitions and during the recovery process. Therefore, this 100% online degree aims for the student to acquire the latest psychological techniques that will be of great help when setting objectives and setting goals in the athlete.

“

Sports Science professionals must continue their training to adapt to new developments in the field"

Behind all the achievements and merits obtained by an athlete and his team, there is an engine much more important than his physical strength, speed or tactics, and that is his mind. This is one of the main reasons why an athlete should have a psychologist among his team, in charge of developing the athlete's mental stability to achieve success.

The sports psychologist plays a very important role in an athlete's career, as he/she has a direct influence in many areas such as crisis and stress management, motivation, group cohesion and connection, among others. This degree will enable the student to advance in his profession as he updates his knowledge, to make him a fully qualified professional.

As it is a 100% online University Course, the student is not conditioned by fixed schedules or the need to move to another physical location. Using a device with internet access, you can consult the rich content that will help you acquire psychological techniques to reach the elite in the Sports Science sector. All this, at any time of the day, combining, at your own pace, your work and personal life with your academic life.

This **Postgraduate Certificate in Psychological Techniques Applied to Sports** contains the most complete and up to date educational program on the market. The most important features include:

- ◆ The development of case studies presented by Masters in coaching and sports psychology.
- ◆ The graphic, schematic and eminently practical contents of the book provide practical information on those disciplines that are essential for professional practice.
- ◆ Practical exercises where self-assessment can be used to improve learning.
- ◆ Its special emphasis on innovative methodologies
- ◆ Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- ◆ Content that is accessible from any fixed or portable device with an Internet connection

Combine your studies with your professional work while increasing your knowledge in this field"

“

This Postgraduate Certificate is the best investment you can make in choosing an updated program to update your knowledge in Sport Psychology"

The program's teaching staff includes professionals from the sector who contribute their work experience to this training program, as well as renowned specialists from leading societies and prestigious universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive training programmed to train in real situations.

This program is designed around Problem Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

We are the only online University that offers Harvard materials as teaching material in its trainings

This course will open doors to new career opportunities. Do not miss this opportunity

02 Objectives

Among a number of objectives, the program design of this Postgraduate Certificate will enable the graduate to build confidence and positive influence on the athlete through the study of inclusive and sport-specific sports. It will also unravel the decision-making process in sport, while delving into comprehensive goal and competition plans. All this, through the adoption of psychological techniques to generate confidence and emotional self-control in the athlete.

“

If you are looking to boost your professional career, TECH is the university for you”

- 1.6. Effects of Generating Awareness of Learning on Confidence, Self-Efficacy and Performance
- 1.7. Self-instruction Training
- 1.8. Mindfulness Applied to Sport
- 1.9. NLP Applied to Sport
- 1.10. Motivation and Emotion

“

*A unique learning experience,
key and decisive to boost your
professional development”*

04 Methodology

This training program provides you with a different way of learning. Our methodology uses a cyclical learning approach: **Re-learning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Re-learning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

Our program offers a revolutionary method of skills and knowledge development. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

“

At TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world"

Our university is the first in the world to combine Harvard Business School case studies with a 100%-online learning system based on repetition

A learning method that is different and innovative.

This intensive Sports Science program at TECH Technological University prepares you to face all the challenges in this field, both nationally and internationally. We are committed to promoting your personal and professional growth, the best way to strive for success, that is why at , TECH you will use Harvard *case studies*, with which we have a strategic agreement that allows us to provide our students with material from the best university the world.

“ We are the only online university that offers Harvard materials as teaching materials on its courses”

The case method is the most widely used learning system by the best faculties in the world. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question we face in the case method, an action-oriented learning method. Throughout the program, the studies will be presented with multiple real cases. They will have to combine all their knowledge and research, and argue and defend their ideas and decisions.

The student will learn, through collaborative activities and real cases, how to solve complex situations in real business environments

Re-learning Methodology

Our university is the first in the world to combine Harvard University case studies with a 100%-online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance Harvard case studies with the best 100% online teaching method: Re-learning.

In 2019 we obtained the best learning results of all Spanish-language online universities in the world

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Re-learning.

Our university is the only Spanish-speaking university qualified to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best Spanish online university indicators.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

With this methodology we have trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, markets, and financial instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Re-learning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is really specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

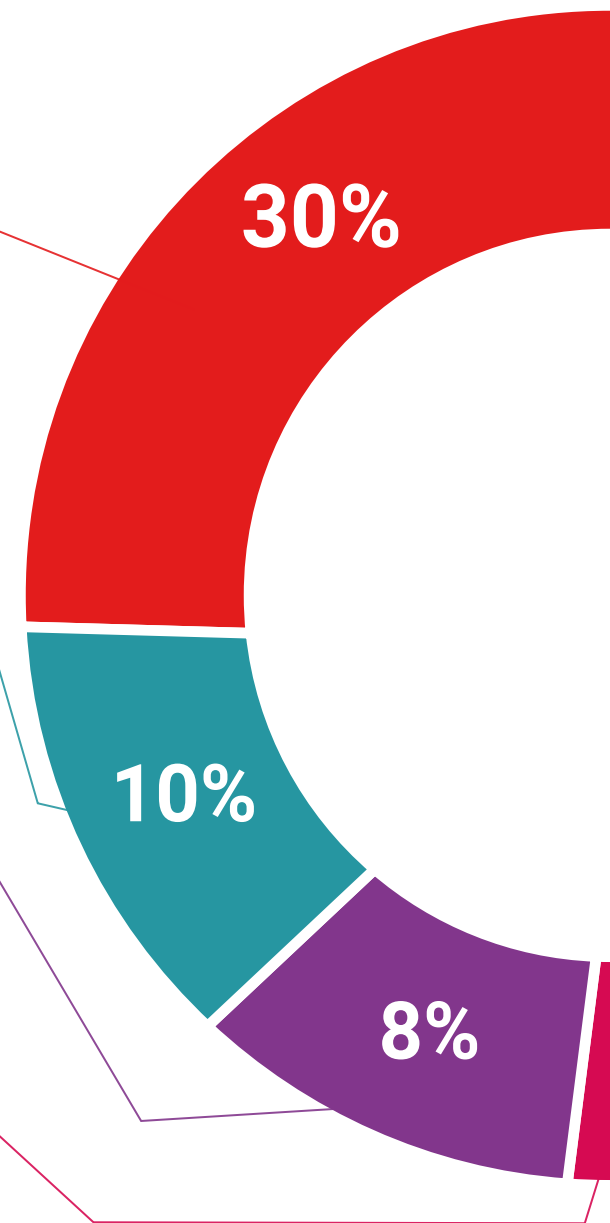

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Case Studies

They will complete a selection of the best case studies in the field used at Harvard. Cases that are presented, analyzed, and supervised by the best senior management specialists in Latin America.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

05 Certificate

The Postgraduate Certificate in Psychological Techniques Applied to Sports guarantees, in addition to the most rigorous and up to date training, access to a Postgraduate Certificate issued by TECH Technological University.

“

*Successfully complete this training program
and receive your certificate without travel or
laborious paperwork”*

This **Postgraduate Certificate in Psychological Techniques Applied to Sports** contains the most complete and up to date scientific program on the market.

After the students have passed the assessments, they will receive their corresponding **Postgraduate Certificate** diploma issued by **TECH Technological University** via tracked delivery*.
