Introduction

Nulliparous sows are used to replace cull sows, that is, they are the future breeding females in swine farming. Replacement sows cannot be managed as fattening sows because it requires very special attention based on proper sanitation, special housing conditions, diet, management and animal welfare suitable for future breeder. Students will acquire all this knowledge from the hand of expert veterinarians, which can be put directly into practice in daily work.

A close-up photograph of a pig's snout, showing the texture of the skin and the shape of the nostrils. The pig is light-colored, possibly pink or white. The image is partially obscured by a diagonal teal and white graphic overlay.

“

A complete and total update in Breeding Sow Characteristics with the most comprehensive and effective program on the online educational market”

The most important reproductive objectives in breeding are early onset of puberty and waiting for the sow and her genital apparatus to develop before starting the first gestation, which should ensure a high ovulation rate and high uterine capacity leading to high prolificacy. It is also essential for sows to grow adequately, which will be assessed through body weight and condition, correct poise and temperament linked to a great capacity to adapt to adverse conditions.

However, the objective of nulliparous female reproduction is not only gestation, but to have high prolificacy throughout their reproductive life. In this sense, it should be noted that sows with high prolificacy in first farrowing will have high prolificacy in the following farrowings, and the other way around. This is why great effort must be invested in the breeding and diet of gilts, as they are the future of the farm.

The Postgraduate Certificate in Breeding Sow Characteristics contains the most complete and up-to-date online educational program on the market. The contents will be available to access from any fixed or portable device with an Internet connection guarantees students will be able to use their available time to achieve his double objective: training and qualification. Furthermore, the Postgraduate Certificate's methodological design integrates the latest advances in educational technology that will facilitate learning.

The **Postgraduate Certificate in Breeding Sow Characteristics** contains the most complete and up-to-date educational program on the market. The most important features include:

- ◆ The latest technology in online teaching software
- ◆ A highly virtual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- ◆ Practical cases presented by practicing experts
- ◆ State-of-the-art interactive video systems
- ◆ Teaching supported by telepractice
- ◆ Continuous updating and recycling systems
- ◆ Autonomous learning: full compatibility with other occupations
- ◆ Practical exercises for self-evaluation and learning verification
- ◆ Support groups and educational synergies: questions to the expert, debate and knowledge forums
- ◆ Communication with the teacher and individual reflection work
- ◆ Content that is accessible from any fixed or portable device with an Internet connection
- ◆ Banks of complementary documentation permanently available, even after the program is complete

Join the elite with this highly effective training and pave new ways to advance professionally”

“ *A complete training program that will allow you to acquire the most advanced knowledge in all the areas of intervention of a specialized veterinarian* ”

Our teaching staff is made up of professionals from different fields related to this specialty. That way, we can be sure to offer students the pedagogical update we aim to provide. A multidisciplinary team of professionals trained and experienced in different environments, who will develop the theoretical knowledge in an efficient way above all, they will bring their practical knowledge from their own experience to the course: one of the differential qualities of this training.

The efficiency of the methodological design of this Professional Master's Degree, enhances the student's understanding of the subject. Developed by a multidisciplinary team of e-learning experts, it integrates the latest advances in educational technology. This way, you will be able to study with a range of comfortable and versatile multimedia tools that will give you the operability you need in your training.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: With the help of an innovative, interactive video system and learning from *an expert*, you will be able to acquire the knowledge as if you were dealing with the case you are studying in real time. A concept that will allow you to integrate and fix learning in a more realistic and permanent way.

With a methodological design based on proven teaching techniques, this innovative course will take you through different teaching approaches to allow you to learn in a dynamic and effective way.

Our innovative telepractice concept will give you the opportunity to learn through an immersive experience, which will provide you with a faster integration and a much more realistic view of the contents: “learning from an expert.”

02 Objectives

Our objective is to train highly qualified professionals for the working An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is materialized in helping professionals to reach a much higher level of competence and control. A goal that, in just a few months you will be able to achieve, with a high intensity and effective training.

“

If your objective is to broaden your skill set to pave new ways toward success and development, this is the course for you: A training that aspires to excellence”

General Objectives

- Examine the reproductive sow anatomy and physiology as a basis for the use of reproductive biotechnology on the farm
- Provide a rationale for proper sow reproductive management guidelines
- Analyze appropriate methods of hormonal reproductive control for sows
- Evaluate the characteristics of replacement sows in breeding
- Identify best timing for first insemination
- Propose productive farm parameters
- Define the concept of hyperprolific sows

A path to achieve training and professional growth that will propel you towards a greater level of competitiveness in the employment market"

Specific Objectives

- ◆ Evaluate appropriate guidelines to select future breeding females
- ◆ Present the sexual cycle of sows as a basis for reproductive hormonal management and control
- ◆ Define puberty and its management
- ◆ Propose different hormonal control protocols in breeding sows
- ◆ Identify at what reproductive moment the use of each type of hormone is required
- ◆ Establish nulliparous sow diets
- ◆ Specify the most important reproductive indexes in swine production
- ◆ Analyze the reproductive features hyperprolific sows should present

03

Course Management

Within the concept of total quality of our program, we are proud to put at your disposal a Teaching Staff of the highest level, chosen for their proven experience. Professionals from different areas and fields of expertise that make up a complete, multidisciplinary team. A unique opportunity to learn from the best.

“

Our teaching team, experts in Swine Production and Clinical Practice, will help you achieve success in your profession”

Management

Dr. Falceto Recio, Victoria

- ♦ Degree in Veterinary Medicine from the University of Zaragoza
- ♦ President of the board of directors AVPA at Pig Veterinary Association of Aragon
- ♦ Secretary of the board of directors ANAVEPOR National Association of Pig Veterinarians
- ♦ Spokesperson for the Board of Directors of ANAPORC Association of Scientific Pork Producers
- ♦ Member of AERA Spanish Association of Animal Reproduction
- ♦ Diploma in Pedagogical Training for university professors at the Institute of Education Sciences, University of Zaragoza
- ♦ Advanced Course in Animal Production (Animal Reproduction Cycle from the Mediterranean Agronomic Institute of Zaragoza)
- ♦ Substitutions as a rural veterinarian
- ♦ Specialization stays at several universities and institutions
- ♦ Responsible for the Reproduction and Obstetrics Service at the Veterinary Hospital, University of Zaragoza
- ♦ Member of the Instituto Universitario de Investigación Mixto Agroalimentario de Aragón IA2 (University Institute of Mixed Agrifood Research of Aragón)

04

Structure and Content

The contents of this Postgraduate Certificate have been developed by the different experts on this course, with a clear purpose: to ensure that our students acquire each and every one of the necessary skills to become true experts in this field.

A complete and well-structured program will take you to the highest standards of quality and success.

“

A comprehensive teaching program, structured in well-developed teaching units, oriented toward learning that is compatible with your personal and professional life"

Module 1. Breeding Females

- 1.1. Genital Apparatus Anatomy in Sows: Reproductive Physiology
 - 1.1.1. Embryology
 - 1.1.2. Anatomy
 - 1.1.3. Histology
 - 1.1.4. Physiology
 - 1.1.5. Practical Applications on Farms
- 1.2. Puberty: Puberty Management
 - 1.2.1. Puberty
 - 1.2.2. Factors Influencing the Onset of Puberty
 - 1.2.3. Puberty Induction
 - 1.2.4. Puberty Diagnosis
- 1.3. Future Breeding Female Selection
 - 1.3.1. Early Puberty
 - 1.3.2. Genital Apparatus Development
 - 1.3.3. Weight and Body Condition
 - 1.3.4. Poise
 - 1.3.5. Temperament and Adaptability
- 1.4. Reproductive Cycles in Sows
 - 1.4.1. Reproductive Cycle Characteristics and Phases
 - 1.4.2. Hypothalamic-Pituitary-Ovarian Axis Function
 - 1.4.3. Follicular and Luteal Dynamics
 - 1.4.4. Luteolysis
- 1.5. Induction of Estrus: Delayed Puberty Treatment
 - 1.5.1. Reproductive Hormone Classification
 - 1.5.2. Gonadotropic Hormone Features
 - 1.5.3. Induction of Estrus
 - 1.5.4. Delayed Puberty Treatment

- 1.6. Estrus Synchronization
 - 1.6.1. Progestogen Features
 - 1.6.2. Estrus Synchronization Protocol
 - 1.6.3. Causes of Estrus Synchronization Failure
 - 1.6.4. Practical Applications on Farms
- 1.7. First Insemination
 - 1.7.1. Age
 - 1.7.2. Weight and Body Condition
 - 1.7.3. Number of Estrus Cycles
 - 1.7.4. Practical Recommendations
- 1.8. Nulliparous Sow Diet
 - 1.8.1. Replacement Sow Needs in Fattening
 - 1.8.2. Diet Strategies
 - 1.8.3. Diet Flushing
- 1.9. Main Reproductive Parameters
 - 1.9.1. Indicator Description
 - 1.9.2. Wean-to-Estrus Interval and Wean-to-Fertile Mating Interval
 - 1.9.3. Fertility
 - 1.9.4. Prolificity
 - 1.9.5. Breeding Sows and Neonatal Mortality
 - 1.9.6. Non-Productive Days
 - 1.9.7. Other Parameters
- 1.10. Hyperprolific Sow Reproductive Features
 - 1.10.1. Definition
 - 1.10.2. Reproductive Possibilities and Limitations
 - 1.10.3. The Importance of Follicular Development and Ovulation Rate
 - 1.10.4. The Influence of Uterine Capacity

05 Methodology

This academic program offers students a different way of learning. Our methodology uses a cyclical learning approach: **Relearning.**

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"

At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvás, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the actual conditions in a veterinarian's professional practice.

“

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method”

The effectiveness of the method is justified by four fundamental achievements:

1. Veterinarians who follow this method not only manage to assimilate concepts, but also develop their mental capacity through exercises to evaluate real situations and knowledge application
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. The feeling that the effort invested is effective becomes a very important motivation for veterinarians, which translates into a greater interest in learning and an increase in the time dedicated to working on the course.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Veterinarians will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology more than 65,000 veterinarians have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. Our teaching method is developed in a highly demanding environment, where the students have a high socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current and procedures of veterinary techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

Interactive Summaries

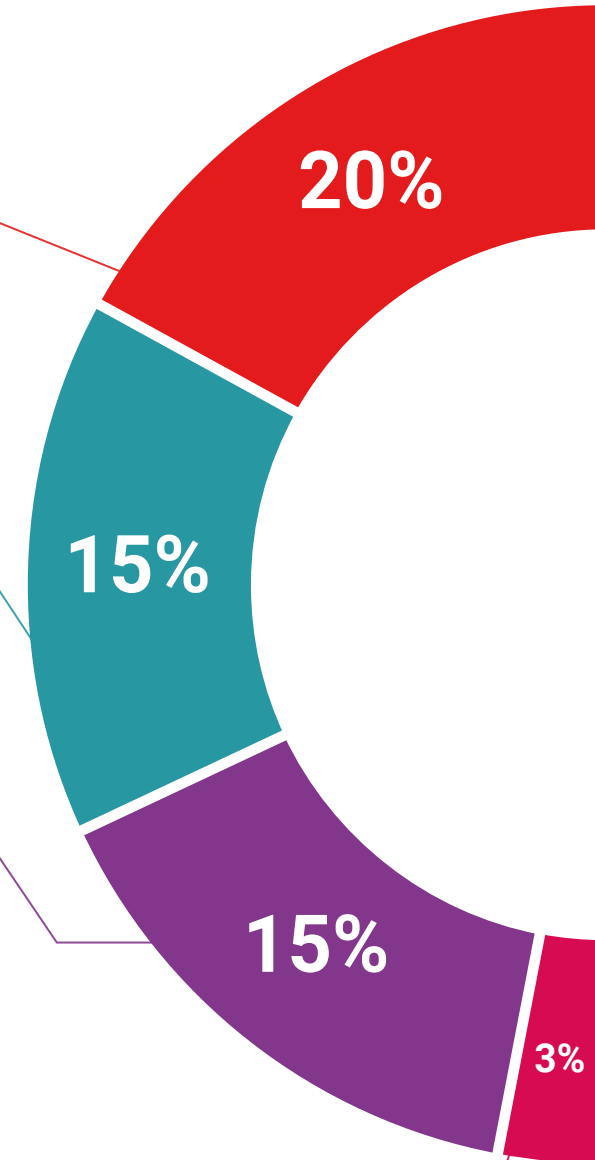

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

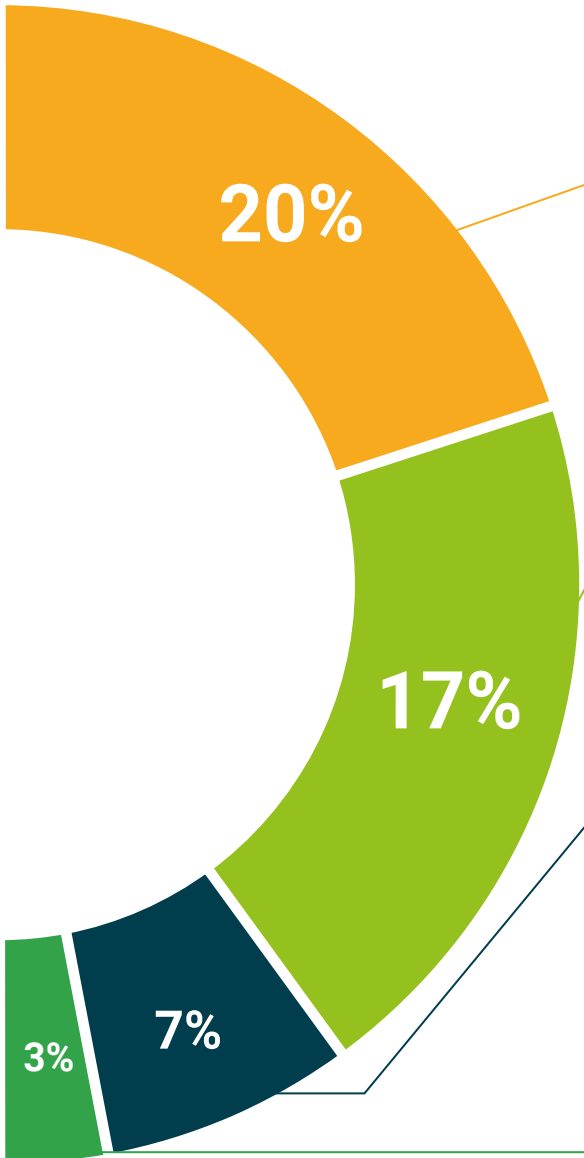

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

06 Certificate

The Postgraduate Certificate in Breeding Sow Characteristics guarantees students, in addition to the most rigorous and up-to-date education, access to a Postgraduate Certificate issued by TECH Technological University.

“

Successfully complete this program and receive your university qualification without having to travel or fill out laborious paperwork”

This **Postgraduate Certificate in Breeding Sow Characteristics** contains the most complete and up-to-date scientific program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the Postgraduate Certificate, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional from career evaluation committees.

Title: **Postgraduate Certificate in Breeding Sow Characteristics**

Official Number of Hours: **150 h.**

*Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH EDUCATION will make the necessary arrangements to obtain it, at an additional cost.
