# Introduction

Judicial expertise in the field of veterinary medicine requires a deep and detailed knowledge of the most relevant aspects of the different elements of this field. In this Postgraduate Certificate in Civil Veterinary Expertise TECH offers a complete training in the judicial evidence, the bases of veterinary intervention from the legal point of view and the civil liability associated with this activity. A compendium of knowledge that will give your training a boost for success.

“

*Become one of the most demanded professionals of the moment with this complete Postgraduate Certificate in Civil Veterinary Expertise”*

The current social need for professionals specialized in the expertise in legal proceedings requires specific training from an eminently practical perspective, and veterinary medicine is no exception. The current social need for professionals specialized in the expertise in legal proceedings requires specific training from an eminently practical perspective, and veterinary medicine is no exception. The more scientific support a legal decision has, the more justice it will impart.

This is precisely the reason for the creation of this Postgraduate Certificate in Civil Veterinary Expertise, in which we count on the collaboration of authors directly related to Judicial Expertise with more than enough professional and teaching experience. Experts from Schools of Legal Practice, Masters of Access to the Legal Profession, Faculty of Veterinary Medicine, who have previously taught Judicial Expert Training Courses in the Veterinary field.

The Postgraduate Certificate will analyze in detail all the questions that may arise for a Veterinary Graduate who intends to enter the world of expertise in Courts. The objective of this training is to take the veterinary professionals through a complete development, enabling them through a solid training to be able to intervene with judgment and responsibility in any legal proceeding to which they may be called.

This **Postgraduate Certificate in Civil Veterinary Expertise** offers you the characteristics of a program of high scientific, teaching and technological level. These are some of its most notable features:

- ◆ The latest technology in online teaching software
- ◆ Intensely visual teaching system, supported by graphic and schematic contents, easy to assimilate and understand
- ◆ Practical cases presented by practising experts
- ◆ State-of-the-art interactive video systems.
- ◆ Teaching supported by telepractice
- ◆ Continuous updating and recycling systems
- ◆ Autonomous learning: full compatibility with other occupations
- ◆ Practical exercises for self-evaluation and learning verification
- ◆ Support groups and educational synergies: questions to the expert, debate and knowledge forums.
- ◆ Communication with the teacher and individual reflection work
- ◆ Availability of content from any fixed or portable device with internet connection

*Get a complete and adequate qualification in Civil Veterinary Expertise and open new paths to your professional progress"*

“

*With a methodological design that relies on teaching techniques proven for their effectiveness, this Postgraduate Certificate in Civil Veterinary Expertise will take you through different teaching approaches to allow you to learn in a dynamic and effective way"*

Our teaching staff is made up of professionals from different fields related to this specialty. In this way, TECH ensure that we provide you with the up-to-date training we are aiming for. A multidisciplinary team of professionals trained and experienced in different environments, who will develop the theoretical knowledge in an efficient way, but above all, will put at the service of the Postgraduate Certificate the practical knowledge derived from their own experience: one of the differential qualities of this training.

This mastery of the subject is complemented by the effectiveness of the methodological design of this Postgraduate Certificate in Civil Veterinary Expertise. Developed by a multidisciplinary team of *e-Learning* experts, it integrates the latest advances in educational technology. In this way, the students will be able to study with a set of comfortable and versatile multimedia tools that will give them the operability they need in their training.

The design of this program is based on Problem-Based Learning: an approach that conceives learning as a highly practical process. To achieve this remotely, we will use telepractice: with the help of an innovative interactive video system and *Learning from an Expert* you will be able to acquire the knowledge as if you were facing the scenario you are learning at that moment. A concept that will allow students to integrate and memorize what they have learnt in a more realistic and permanent way.

*With the experience of professionals from the judiciary, prosecution, law, veterinary and university fields.*

*A Postgraduate Certificate in Civil Veterinary Expertise that will allow you to acquire all the necessary knowledge in this area.*

# 02 Objectives

The objective is to train highly qualified professionals for work experience. An objective that is complemented, moreover, in a global manner, by promoting human development that lays the foundations for a better society. This objective is focused on helping medical professionals reach a much higher level of expertise and control. A goal that, in just three months, you will be able to achieve with a highly intensive and precise course.

“

*If your objective is to broaden your skills set to include new paths of success and development: this is the program for you: a training that aspires to excellence"*

## General Objectives

---

- ◆ Become aware of being in possession of the necessary knowledge as a veterinary professional to be able to issue an expert report
- ◆ Know how to project the technical knowledge in the corresponding written opinion with the necessary wording and clarity so that it can be understood by all parties
- ◆ Acquire the necessary knowledge of the legislation on the functions of veterinary experts
- ◆ Examine and analyze specific cases that have been the subject of veterinary expert reports in court and the importance of these reports in resolving the specific case
- ◆ Know the general principles of veterinary law and the different veterinary activities in which they are applied
- ◆ Acquire the necessary knowledge of what an expert opinion is
- ◆ Acquire the necessary skills and abilities to know how the veterinary expert should give an opinion
- ◆ Become aware, in general, of the trial or hearing as one of the moments, probably the supreme one, of the judicial processes
- ◆ Become aware of the possibility of incurring liability as a consequence of the practice of the veterinary profession and of the judicial expertise
- ◆ Know the ethics, dignity and professional discipline of the veterinary expert
- ◆ Provide the professional with full knowledge of the operation of the livestock farm and the food industry, from the birth of the animal to its commercialization
- ◆ Know the common general principles that all criminal proceedings require in order to lay the foundations that will later guarantee the correct performance of the veterinary testimony or expertise

## Specific Objectives

---

- ◆ Understand how a veterinary expert has to deal with the preparation of an expert's report
- ◆ Act appropriately before the labor courts, taking into account their special characteristics of unity of action and orality, which requires knowledge of how to present an opinion before this jurisdiction.
- ◆ Know the procedural dynamics of labor trials and the specialties that arise in the practice of this evidence
- ◆ Develop properly before an eminently oral trial in which the conviction of the opinion has to be reached after the oral intervention in the trial, subject to contradiction
- ◆ Understand the casuistry that may lead to a declaration of civil liability
- ◆ Act duly before the Courts of this jurisdiction, in order to know how to transmit and illustrate to their holders the technical-scientific knowledge of the veterinary expert
- ◆ Know the functions of the agents involved in the civil process (Judges and Lawyers, fundamentally)
- ◆ Be duly prepared for any circumstance that may arise in the civil procedure, knowing in advance the possibilities of action of the agents involved in this type of process
- ◆ Learn how to properly challenge the judgment of other experts

“

*A comprehensive teaching program, structured in well-developed teaching units, oriented towards learning that is compatible with your personal and professional life"*

# 05 Methodology

This training program offers a different way of learning. Our methodology uses a cyclical learning approach: **Relearning**.

This teaching system is used, for example, in the most prestigious medical schools in the world, and major publications such as the **New England Journal of Medicine** have considered it to be one of the most effective.

“

*Discover Relearning, a system that abandons conventional linear learning, to take you through cyclical teaching systems: a way of learning that has proven to be extremely effective, especially in subjects that require memorization"*

## At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

*With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.*

According to Dr. Gervas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the actual conditions in a veterinarian's professional practice.

“

*Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method.*

The effectiveness of the method is justified by four fundamental achievements:

1. Veterinarians who follow this method not only manage to assimilate concepts, but also develop their mental capacity through exercises to evaluate real situations and knowledge application.
2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
4. The feeling that the effort invested is effective becomes a very important motivation for veterinarians, which translates into a greater interest in learning and an increase in the time dedicated to working on the course.

## Relearning Methodology

At TECH we enhance the Harvard case method with the best 100% online teaching methodology available: Relearning.

This university is the first in the world to combine the study of clinical cases with a 100% online learning system based on repetition, combining a minimum of 8 different elements in each lesson, a real revolution with respect to the mere study and analysis of cases.

*Veterinarians will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.*

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology more than 65,000 veterinarians have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. Our teaching method is developed in a highly demanding environment, where the students have a high socio-economic profile and an average age of 43.5 years.

*Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.*

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

This program offers the best educational material, prepared with professionals in mind:

#### Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### Latest Techniques and Procedures on Video

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current and procedures of veterinary techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive multimedia content presentation training Exclusive system was awarded by Microsoft as a "European Success Story".

#### Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### Expert-Led Case Studies and Case Analysis

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises: so that they can see how they are achieving your goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

#### Quick Action Guides

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.
