# tech 06 | Introduction

Swine diseases in the productive phases of transition and estrus have a high economic impact in today's swine industry. The significance is such that some of these diseases are of compulsory notification to the proper health authorities. It is therefore essential for swine veterinarians to have a detailed knowledge of infectious processes, as it is crucial to identify them promptly and to propose control measures.

Identifying diseases in transition and fattening phases is a challenge for these professionals. Most of the diseases observed in these phases involve several pathogens, so the diagnostic approach based on clinical observation and laboratory confirmation is paramount for a global approach.

This global approach to swine diseases in transition and fattening involves developing antimicrobial treatment strategy to minimize the impact of the process, to propose animal management measures, and to design preventive strategies for these pathogens.

The Postgraduate Certificate in Health in Sow Transition and Estrus contains the most complete and up-to-date educational program on the market. The contents will be available to access from any fixed or portable device with an Internet connection guarantees students will be able to use their available time to achieve his double objective: training and qualification. Furthermore, the program's methodological design integrates the latest advances in educational technology that will facilitate learning.

This **Postgraduate Certificate in Health in Sow Transition and Estrus** contains the most complete and up-to-date educational program on the market. The most important features include:

- » The latest technology in online teaching software
- » A highly virtual teaching system, supported by graphic and schematic contents that are easy to assimilate and understand
- » Practical cases presented by practicing experts
- » State-of-the-art interactive video systems
- » Teaching supported by telepractice
- » Continuous updating and recycling systems
- » Autonomous learning: full compatibility with other occupations
- » Practical exercises for self-evaluation and learning verification
- » Support groups and educational synergies: questions to the expert, debate and knowledge forums
- » Communication with the teacher and individual reflection work
- » Content availability from any fixed or portable device with an Internet connection
- » Supplementary documentation databases are permanently available, even after the course

Join the elite with this highly effective Postgraduate Certificate, which will open new paths for your professional development"

# Introduction | 07 tech

A comprehensive training program that will allow you to acquire the most advanced knowledge in all specialized veterinarian areas of intervention"

Our teaching staff is made up of professionals in different fields related to this specialty. That way, TECH ensures to offer students the updating objective it intends. A multidisciplinary team of professionals trained and experienced in different environments, who will develop the theoretical knowledge in an efficient way above all, they will bring their practical knowledge from their own experience to the course: one of the differential qualities of this program.

The efficiency of the methodological design of this Professional Master's Degree, enhances the student's understanding of the subject. Developed by a multidisciplinary team of *e-learning* experts, it integrates the latest advances in educational technology. This way, students will be able to study with a range of easy-to-use and versatile multimedia tools that will give them the necessary skills for your specialization.

The design of this program is based on Problem-Based Learning:

An approach that conceives learning as an eminently practical process. To achieve this remotely, TECH uses telepractice: With the help of an innovative, interactive video system and *Learning from an Expert*, you will be able to acquire the knowledge as if you were dealing with the case you are studying in real time. A concept that will allow students to integrate and focus their learning in a more realistic and permanent way.

With a methodological design based on proven teaching techniques, this innovative course will take you through different teaching approaches to allow you to learn in a dynamic and effective way.

Our innovative telepractice concept will give you the opportunity to learn through an immersive experience, which will provide you with a faster integration and a much more realistic view of the contents: "Learning from an expert"

# tech 10 | Objectives

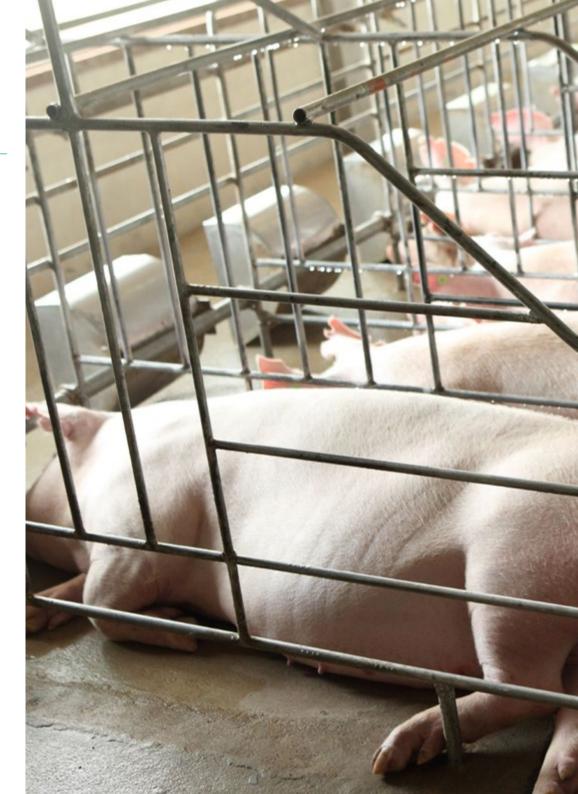

# **General Objectives**

- » Deepen knowledge of the etiology, pathogenesis and epidemiology of the most frequent infectious diseases in pigs during transition and fattening
- » Establish an appropriate diagnostic methodology to identify the infectious process
- » Develop treatment and prevention plans for infectious diseases of interest in swine in the productive phases of transition and fattening
- » Analyze current legislation regulating surveillance and control of infectious diseases, especially officially declared diseases by the competent authority
- » Establish criteria to carry out bibliographic searches and analysis of the different diseases in transition and fattening phase

A path to achieve training and professional growth that will propel you toward a greater level of competitiveness in the job market"

# **Specific Objectives**

- » Identify the main problems caused by infectious pathology during transition and fattening
- » Define the economic and sanitary importance of infectious diseases in swine productive during transition and fattening
- » Delve deeper into the process and method of diagnosis used in the field for each disease
- » Establish the basis for designing treatment plans for the main swine diseases transition and fattening
- » Develop control and prevention strategies for the main swine diseases during transition and fattening
- » Analyze and resolve proposed clinical cases using different strategies
- » Demonstrate the necessary agility to deal with infectious diseases in swine

# tech 14 | Course Management

## Management

## Dr Falceto Recio, Victoria

- Degree in Veterinary Medicine from the University of Zaragoza
- President of the board of directors AVPA at Pig Veterinary Association of Aragon
- Secretary of the board of directors ANAVEPOR National Association of Pig Veterinarians
- Spokesperson for the Board of Directors of ANAPORC Association of Scientific Pork Producers
- Member of AERA Spanish Association of Animal Reproduction
- Diploma in Pedagogical Training for university professors at the Institute of Education Sciences, University of Zaragoza
- Advanced Course in Animal Production (Animal Reproduction Cycle from the Mediterranean Agronomic Institute of Zaragoza)
- Substitutions as a rural veterinarian
- Specialization stays at several universities and institutions
- Responsible for the Reproduction and Obstetrics Service at the Veterinary Hospital University of Zaragoza
- Member of the Instituto Universitario de Investigación Mixto Agroalimentario de Aragón IA2 (University Institute of Mixed Agrifood Research of Aragón)

#### **Professors**

## Dr. Garza Moreno, Laura

- $\,{}^{\mathrm{\scriptscriptstyle N}}\,$  Degree in Veterinary Medicine from the University of Zaragoza
- » Master's Degree in Virology from the Complutense University of Madrid
- » Doctor of Animal Medicine and Health (CUM LAUDE, International Doctorate) from the Universitat Autònoma de Barcelona
- » Pre-doctoral student at the College of Veterinary Medicine, University of Minnesota

- » Speaker at international and Spanish congresses in the swine sector
- » Member of the Association of Swine Veterinarians of Aragon (AVPA)
- » Swine Technical Service at Ceva Animal Health, Spain
- » Research technician at Nutreco Swine Research Centre, the Netherlands

# tech 18 | Structure and Content

## Module 1. Transition and Fattening: Main Diseases

- 1.1. Transition and Fattening: Main Diseases
  - 1.1.1. Swine Respiratory Complex
  - 1.1.2. Introduction
  - 1.1.3. Etiology, Epidemiology and Pathogenesis
  - 1.1.4. Clinical Signs and Lesions
  - 1.1.5. Diagnosis
  - 1.1.6. Treatment, Control and Prevention
- 1.2. Influenza: Atrophic Rhinitis Bordetellosis
  - 1.2.1. Introduction
  - 1.2.2. Etiology, Epidemiology and Pathogenesis
  - 1.2.3. Clinical Signs and Lesions
  - 1.2.4. Diagnosis
  - 1.2.5. Treatment, Control and Prevention
- 1.3. Swine Enzootic Pneumonia and Pleuropneumonia
  - 1.3.1. Introduction
  - 1.3.2. Etiology, Epidemiology and Pathogenesis
  - 1.3.3. Clinical Signs and Lesions
  - 1.3.4. Diagnosis
  - 1.3.5. Treatment, Control and Prevention
- 1.4 Swine Circovirosis
  - 1.4.1. Introduction
  - 1.4.2. Etiology, Epidemiology and Pathogenesis
  - 1.4.3. Clinical Signs and Lesions
  - 1.4.4. Diagnosis
  - 1.4.5. Control and Prevention
- 1.5. Post-Weaning Colibacillosis
  - 1.5.1. Introduction
  - 1.5.2. Etiology, Epidemiology and Pathogenesis
  - 1.5.3. Clinical Signs and Lesions
  - 1.5.4. Diagnosis
  - 1.5.5. Treatment, Control and Prevention

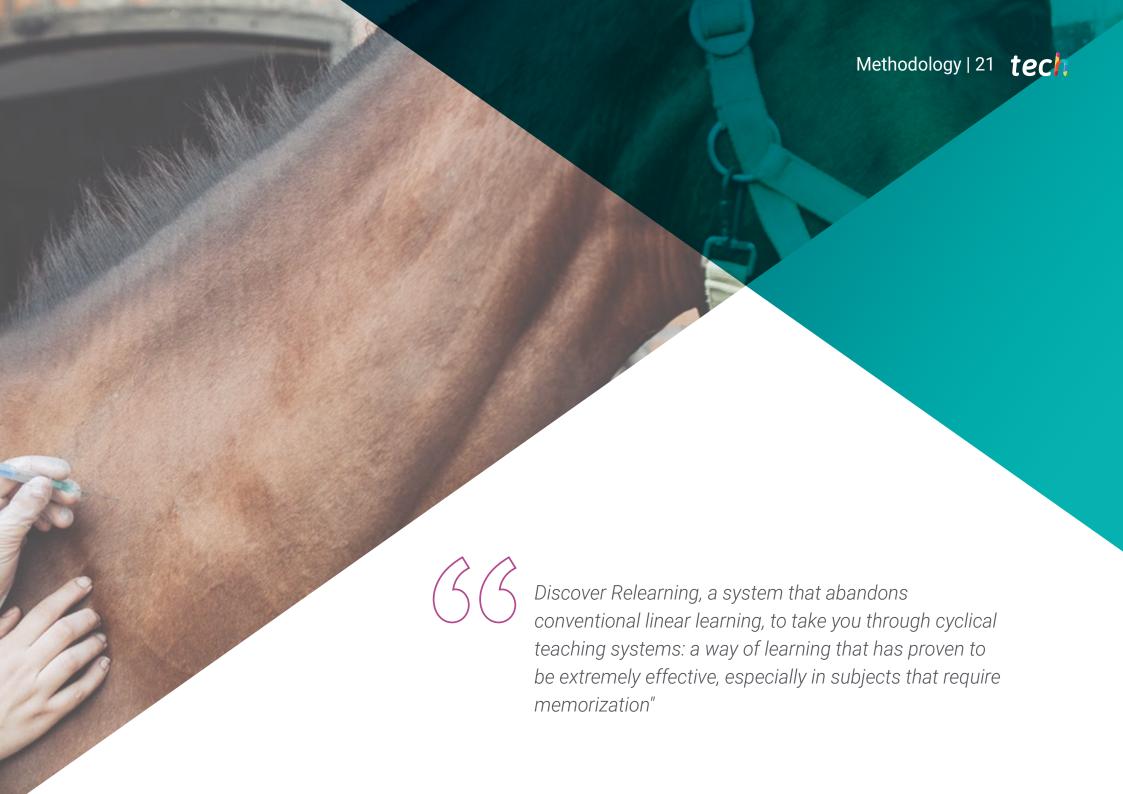

- 1.6. Salmonellosis, Transmissible Gastroenteritis and Swine Epidemic Diarrhea
  - 1.6.1. Introduction
  - 1.6.2. Etiology, Epidemiology and Pathogenesis
  - 1.6.3. Clinical Signs and Lesions
  - 1.6.4. Diagnosis
  - 1.6.5. Treatment, Control and Prevention
- 1.7. Swine Dysentery: Proliferative Enteropathy
  - 1.7.1. Introduction
  - 1.7.2. Etiology, Epidemiology and Pathogenesis
  - 1.7.3. Clinical Signs and Lesions
  - 1.7.4. Diagnosis
  - 1.7.5. Treatment, Control and Prevention
- 1.8. African Swine Fever: Classical Swine Fever Red Disease
  - 1.8.1. Introduction
  - 1.8.2. Etiology, Epidemiology and Pathogenesis
  - 1.8.3. Clinical Signs and Lesions
  - 1.8.4. Diagnosis
  - 1.8.5. Treatment, Control and Prevention
- 1.9. Parasitic Diseases (Ascaris, Trichinellosis, Cysticercosis)
  - 1.9.1. Introduction
  - 1.9.2. Etiology, Epidemiology and Pathogenesis
  - 1.9.3. Clinical Signs and Lesions
  - 1.9.4. Diagnosis
  - 1.9.5. Treatment, Control and Prevention
- 1.10. Vesicular and Skin Diseases
  - 1.10.1. Introduction
  - 1.10.2. Etiology, Epidemiology and Pathogenesis
  - 1.10.3. Clinical Signs and Lesions
  - 1.10.4. Diagnosis
  - 1.10.5. Treatment, Control and Prevention

With the experience of working professionals and the analysis of real success stories, in a high-impact training approach"

# tech 22 | Methodology

#### At TECH we use the Case Method

What should a professional do in a given situation? Throughout the program you will be presented with multiple simulated clinical cases based on real patients, where you will have to investigate, establish hypotheses and, finally, resolve the situation. There is an abundance of scientific evidence on the effectiveness of the method. Specialists learn better, faster, and more sustainably over time.

With TECH you will experience a way of learning that is shaking the foundations of traditional universities around the world.

According to Dr. Gérvas, the clinical case is the annotated presentation of a patient, or group of patients, which becomes a "case", an example or model that illustrates some peculiar clinical component, either because of its teaching power or because of its uniqueness or rarity. It is essential that the case is based on current professional life, in an attempt to recreate the actual conditions in a veterinarian's professional practice.

Did you know that this method was developed in 1912, at Harvard, for law students? The case method consisted of presenting students with real-life, complex situations for them to make decisions and justify their decisions on how to solve them. In 1924, Harvard adopted it as a standard teaching method"

# The effectiveness of the method is justified by four fundamental achievements:

- 1. Veterinarians who follow this method not only manage to assimilate concepts, but also develop their mental capacity through exercises to evaluate real situations and knowledge application
- 2. Learning is solidly translated into practical skills that allow the student to better integrate into the real world.
- 3. Ideas and concepts are understood more efficiently, given that the example situations are based on real-life.
- **4.** The feeling that the effort invested is effective becomes a very important motivation for veterinarians, which translates into a greater interest in learning and an increase in the time dedicated to working on the course.

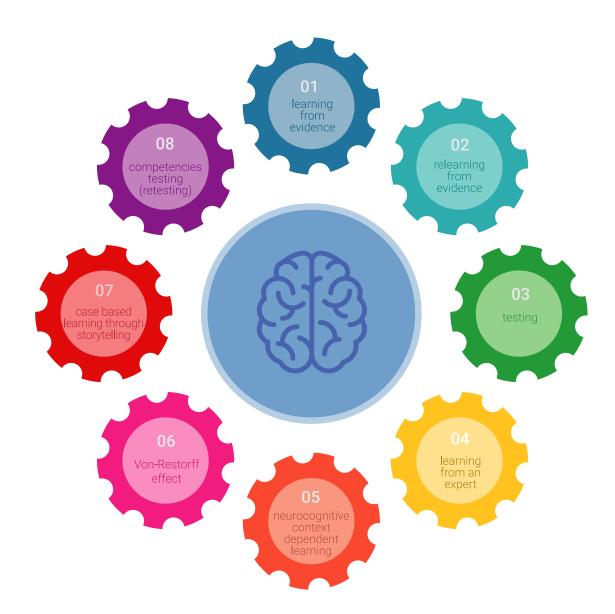

# Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

Veterinarians will learn through real cases and by resolving complex situations in simulated learning environments. These simulations are developed using state-of-the-art software to facilitate immersive learning.

# Methodology | 25 tech

At the forefront of world teaching, the Relearning method has managed to improve the overall satisfaction levels of professionals who complete their studies, with respect to the quality indicators of the best online university (Columbia University).

With this methodology more than 65,000 veterinarians have been trained with unprecedented success in all clinical specialties, regardless of the surgical load. Our teaching method is developed in a highly demanding environment, where the students have a high socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

The overall score obtained by TECH's learning system is 8.01, according to the highest international standards.

# tech 26 | Methodology

This program offers the best educational material, prepared with professionals in mind:

#### **Study Material**

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

#### **Latest Techniques and Procedures on Video**

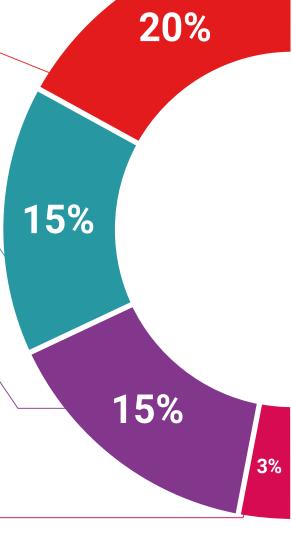

TECH introduces students to the latest techniques, the latest educational advances and to the forefront of current and procedures of veterinary techniques. All of this in direct contact with students and explained in detail so as to aid their assimilation and understanding. And best of all, you can watch the videos as many times as you like.

#### **Interactive Summaries**

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

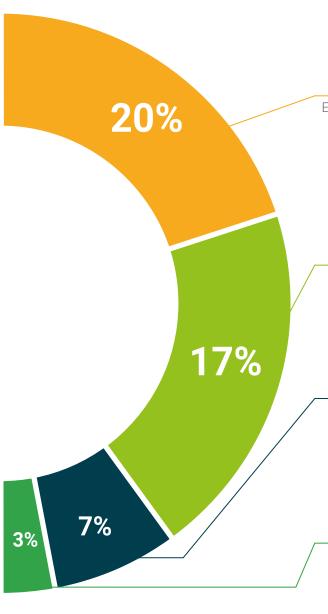

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

#### **Additional Reading**

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

#### **Expert-Led Case Studies and Case Analysis**

Effective learning ought to be contextual. Therefore, TECH presents real cases in which the expert will guide students, focusing on and solving the different situations: a clear and direct way to achieve the highest degree of understanding.

#### **Testing & Retesting**

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

#### Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

#### **Quick Action Guides**

TECH offers the most relevant contents of the course in the form of worksheets or quick action guides. A synthetic, practical, and effective way to help students progress in their learning.

# tech 30 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in Health in Sow Transition** and **Estrus** endorsed by **TECH Global University**, the world's largest online university.

**TECH Global University** is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in Health in Sow Transition and Estrus

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

Mr./Ms. \_\_\_\_\_, with identification document \_\_\_\_\_ has successfully passed and obtained the title of:

#### Postgraduate Certificate in Health in Sow Transition and Estrus

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).

In Andorra la Vella, on the 28th of February of 2024

<sup>\*</sup>Apostille Convention. In the event that the student wishes to have their paper certificate issued with an apostille, TECH Global University will make the necessary arrangements to obtain it, at an additional cost.
