tech 06 | Introduction

Television has become a space for entertainment and accompaniment for all tastes. There is a program for everyone and knowing this helps industry professionals to continue to create series and documentaries that attract the attention of the audience. In this way, large companies demand full knowledge of production, management and development of television programs.

With this Postgraduate Certificate the student will be able to learn the distinction between Genres and Formats, as well as the most important characteristics of each one of them. In this way, they will be able to create productions that adapt to the tastes of each audience. On the other hand, designers will also be able to analyze the cultural, social and economic aspects of each of the television genres as fundamental elements for their consumption.

Therefore, designers and programmers will have access to the most complete and relevant information on the subject or that will mark a before and after in their qualification and will open the doors to an exciting professional world. Thus, they will be able to access new job opportunities and collaborate in international projects.

This **Postgraduate Certificate in Genres, Formats and Television Programming** contains the most complete and up-to-date educational program on the market. The most important features of the program include:

- Practical cases studies are presented by experts in Design
- The graphic, schematic, and practical contents with which they are created, provide scientific and practical information on the disciplines that are essential for professional practice
- Practical exercises where self-assessment can be used to improve learning.
- Special emphasis on innovative methodologies for studying Genres, Formats and Television Programming
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Interprets, analyzes and comments on the television format from a professional, aesthetic and cultural perspective"

It includes, in its teaching staff, professionals belonging to the field of design, who bring to this program the experience of their work, as well as recognized specialists from prestigious societies and universities.

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide an immersive training experience designed to train for real-life situations.

This program is designed around Problem-Based Learning, whereby the student must try to solve the different professional practice situations that arise during the academic program. For this purpose, the student will be assisted by an innovative interactive video system created by renowned and experienced experts.

Understands the television offer from a social and cultural point of view.

Television continues to be an excellent medium for broadcasting different programs and series.

tech 10 | Objectives

 - 1.1.1. Introduction
 - 1.1.2. Television Genres
- 1.2. Format in Television
 - 1.2.1. Approach to the Concept of Format
 - 1.2.2. Television Formats
- 1.3. Creating Television
 - 1.3.1. The Creative Process in Entertainment
 - 1.3.2. The Creative Process in Fiction
- 1.4. Evolution of Formats in Today's International Market I
 - 1.4.1. Consolidation of the Format
 - 1.4.2. The Reality TV Format
 - 1.4.3. News in Reality TV
 - 1.4.4. Digital Terrestrial Television and Financial Crisis
- 1.5. Evolution of Formats in Today's International Market II
 - 1.5.1. Emerging Markets
 - 1.5.2. Global Brands
 - 1.5.3. Television Reinvents Itself
 - 1.5.4. The Ae of Globalization
- 1.6. Selling the Format. The Pitch
 - 1.6.1. Sale of a Television Format
 - 1.6.2. The Pitching

Structure and Content | 15 tech

- 1.7. Introduction to Television Programs
 - 1.7.1. The Role of Programs
 - 1.7.2. Factors Affecting Programs
- 1.8. Television Programs Models
 - 1.8.1. United States and United Kingdom
 - 1.8.2. Spain
- 1.9. The Professional Practice of Television Programs
 - 1.9.1. The Programs Department
 - .9.2. Programs for Television
- 1.10. Study of Audiences
 - 1.10.1. Television Audience Research
 - 1.10.2. Audience Concepts and Ratings

Television genres encompass many types of content that can allow you to explore different realities and create programs that appeal to audiences"

tech 18 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Over the course of 4 years, you will be presented with multiple practical case studies. You will have to combine all your knowledge, and research, argue, and defend your ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 21 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high-quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

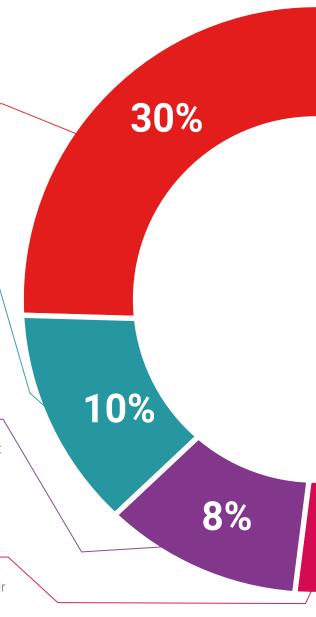

Practising Skills and Abilities

They will carry out activities to develop specific competencies and skills in each thematic area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

25%

3%

Case Studies

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

 \bigcirc

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

tech 26 | Certificate

This Postgraduate Certificate in Television Genres, Formats and Programs contains the most complete and up-to-date program on the market.

After the student has passed the assessments, they will receive their corresponding **Postgraduate Certificate** diploma issued by **TECH Technological University** via tracked delivery*.

The certificate issued by **TECH Technological University** will reflect the qualification obtained in the **Postgraduate Certificate**, and meets the requirements commonly demanded by labor exchanges, competitive examinations and professional career evaluation committees.
