tech 06 | Introduction

This Postgraduate Certificate in NFT and Gamified Economies takes a journey through the evolution of non-fungible tokens and shows their great potential in the digital field. In this program, students will be able to acquire the necessary skills to develop with ease in an emerging sector with great possibilities for the creation of projects in different fields.

The video game professional will not only deepen in this area, but will acquire the necessary knowledge to undertake and create their own NFT, in addition to knowing the objective utilities of the tokens in a space that often has led to speculation. Moving with agility in this area requires knowledge and up-to-date information, therefore, the students will be taught by specialized teaching staff.

During the course of this online training course, students will examine alternative of initiatives in the field of NFT focused on gamified economies. Based on real-life examples utilized to show the benefits after decentralization and cross-connection of completely different games on the market.

A 100% online Postgraduate Certificate that facilitates learning and gives students the freedom to acquire the knowledge when and where they want. Students will only must have a device with internet access to take their career one step further. A modality in line with the current times with all the guarantees to improve in digital abilities.

This **Postgraduate Certificate in NFT and Gamified Economies** contains the most complete and up-to-date program on the market. The most important features include:

- The development of case studies presented by experts in cryptocurrencies, Blockchain and video games
- The graphic, schematic, and practical contents with which they are created, provide practical information on the disciplines that are essential for its professional practice
- Practical exercises where the self-assessment process can be carried out to improve learning
- Its special emphasis on innovative methodologies
- Theoretical lessons, questions to the expert, debate forums on controversial topics, and individual reflection assignments
- Content that is accessible from any fixed or portable device with an Internet connection

Acquire the necessary skills to develop viable strategies with NFT in the world of video games"

The program's teaching staff includes professionals from the sector who contribute their work experience to this educational program, as well as renowned specialists from leading societies and prestigious universities.

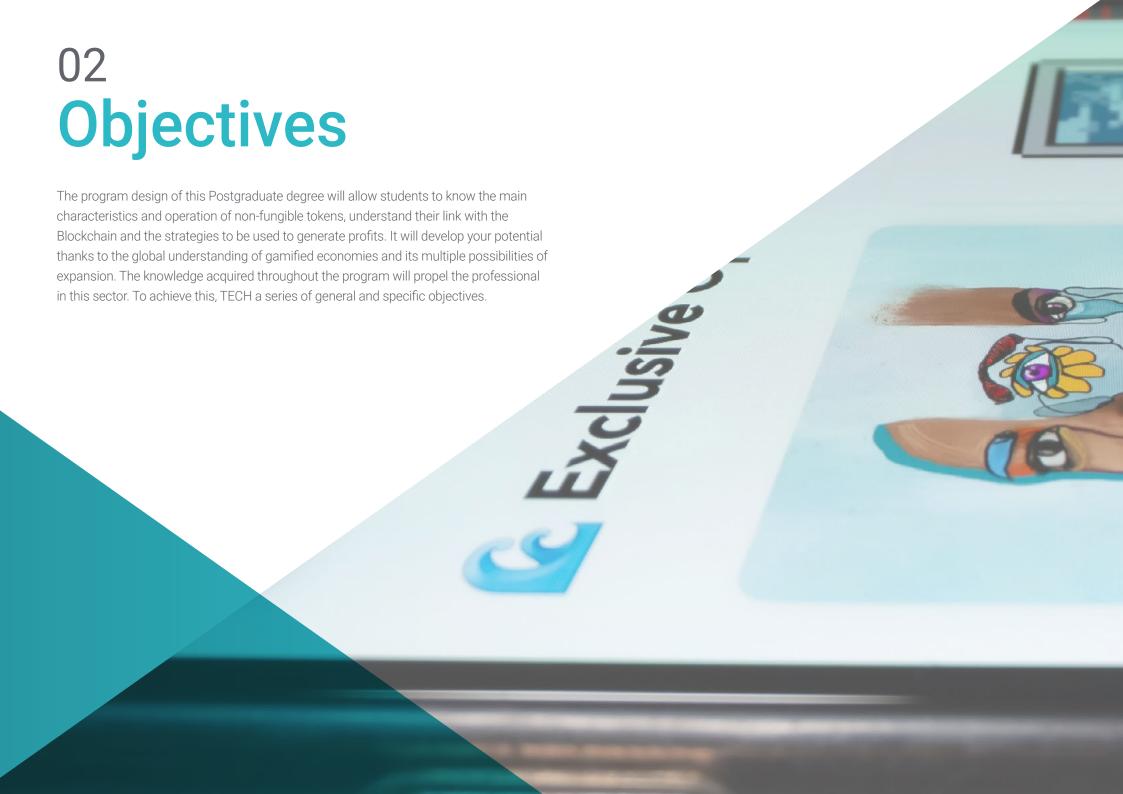

The multimedia content, developed with the latest educational technology, will provide the professional with situated and contextual learning, i.e., a simulated environment that will provide immersive education programmed to learn in real situations.

This program is designed around Problem-Based Learning, whereby the professional must try to solve the different professional practice situations that arise during the academic year For this purpose, the students will be assisted by an innovative interactive video system created by renowned and experienced experts.

Become an expert digital professional in a field in constant transformation.

Get the necessary learning to manage your digital projects in the gaming area.

tech 10 | Objectives

General Objectives

- Identify systematically and in detail of its various components the functioning of Blockchain technology, developing how its advantages and disadvantages are linked to the way in which its architecture functions
- Establish the fundamental characteristics of non-fungible Tokens, their operation and deployment from their emergence to the present day
- Understand the linkage of NFTs to Blockchain and examine strategies for generating and extracting value from non-fungible Tokens
- Analyze the relationship and ways of implementing non-fungible Tokens with gamified economies

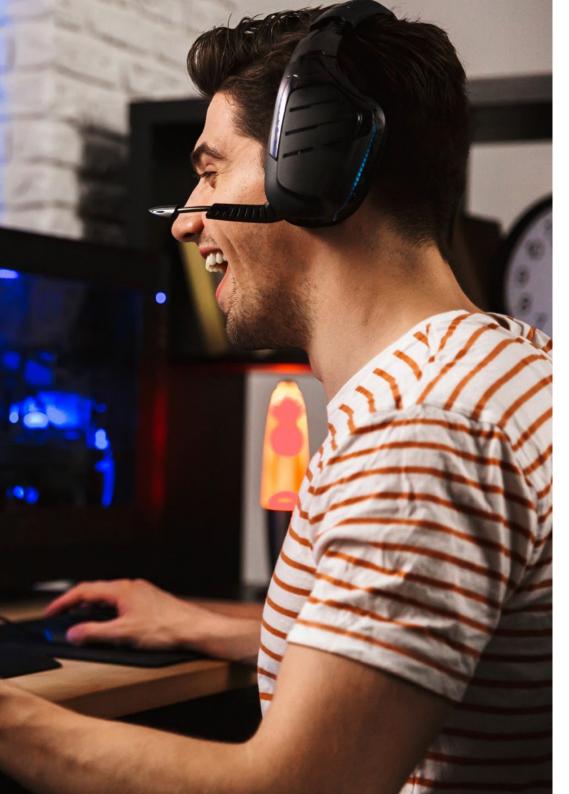

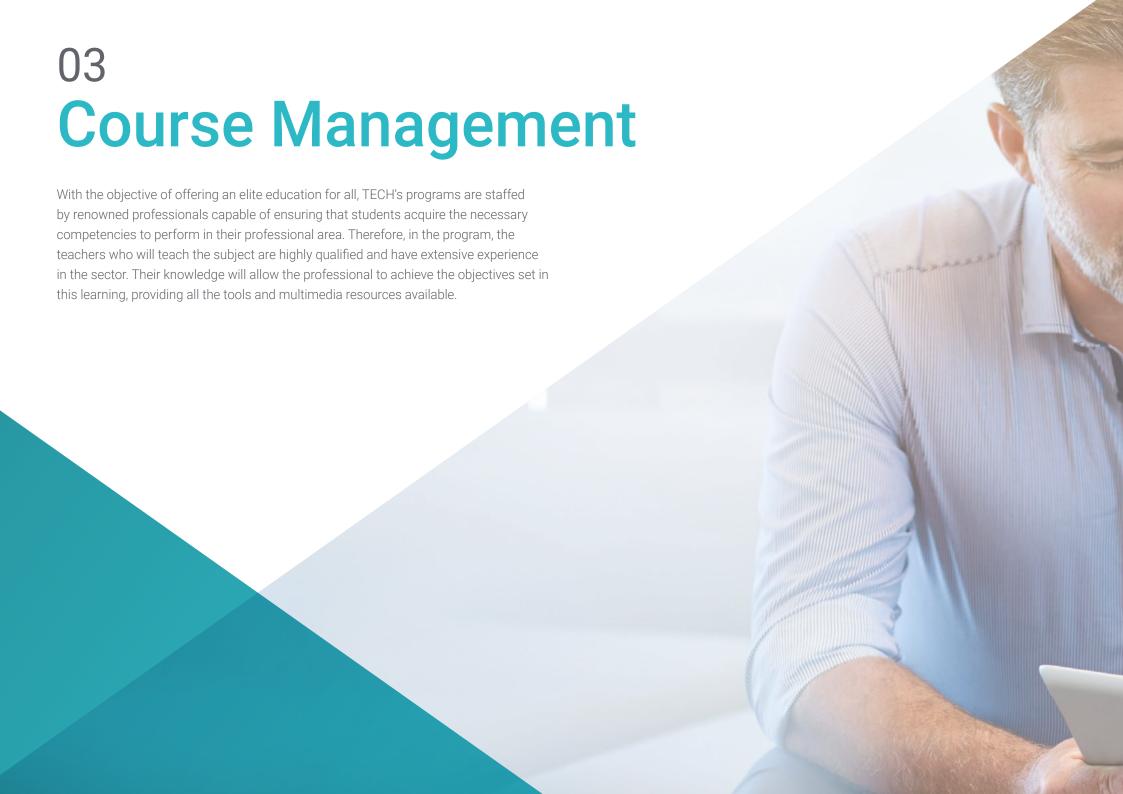

Specific Objectives

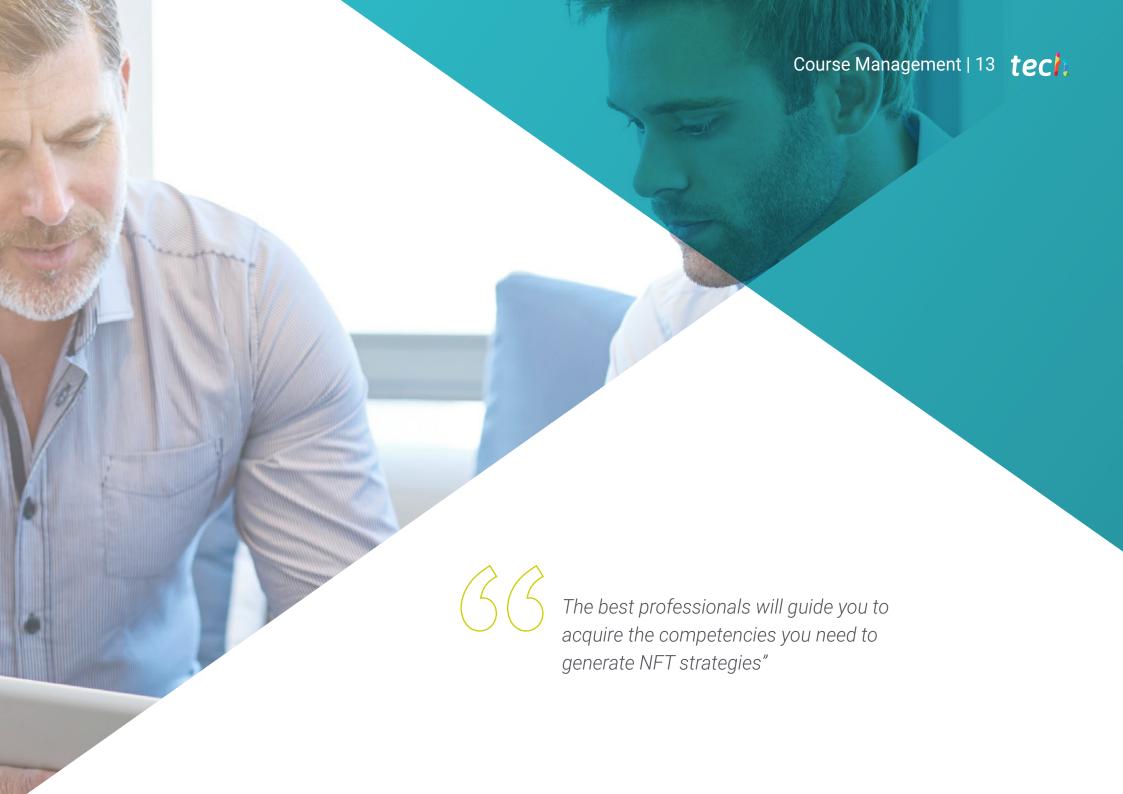

- Mining New NFTs
- Determine the properties of NFT
- Generate innovation strategies based on NFT technology
- Introducing NFT in gamified economies
- Understand the functioning of the NFT mining system in gamified economies
- Identify the value of an NFT in the marketplace
- Employing NFT valorization strategies

You will gain the knowledge you need to boost your professional career thanks to the best tools and a specialized teaching team"

International Guest Director

Rene Stefancic is a leading Blockchain and Web3 technology professional known for his innovative approach and strategic leadership in emerging digital ecosystems. He currently serves as Chief Operating Officer (COO) at Enjin, a pioneering Blockchain and NFT platform, where he manages tasks such as the adoption of new tools and fosters strategic partnerships to drive cutting-edge IT solutions. With a hands-on, results-oriented approach, he applies his "swim or sink" and "try everything" philosophy to every project, always looking to solve the most complex challenges in a scalable and effective way.

Prior to joining Enjin, Stefancic held the position of Head of Marketing at CoinCodex, a platform aimed at cryptocurrency data aggregation. It was in this environment that he consolidated his expertise in growth strategies and digital marketing, taking a decisive role in expanding the company's visibility and reach. His transition to the Blockchain world began when he decided to leave his career in traditional finance to focus on data modeling and analytics in this new sector, thereby laying the foundations for his career in a constantly evolving market.

With a vision focused on product development and IT strategy, the expert excels in leading teams towards the creation of innovative and applicable solutions in the context of Blockchain technology. His ability to build strong and long-lasting business relationships has enabled him to establish key strategic partnerships in the industry, cementing his international reputation as a dynamic leader in the field of technology and digital assets.

Mr. Stefancic, Rene

- Chief Operating Officer (COO) at Enjin, Singapore, Singapore.
- Blockchain Advisor at NFTFrontier
- IT Consultant at RS IT Consulting
- Marketing Director at CoinCodex
- Consultant at NextCash
- Digital Marketing Specialist at Piaggio Group Slovenia
- Master's Degree in Management at the Faculty of Management, University of Primorska

tech 16 | Course Management

Management

Mr. Olmo Cuevas, Alejandro

- Founder of Seven Moons Studios Blockchain Gaming
- Founder of the Niide project
- · Game designer and Blockchain economies for video games
- Writer of fantastic narrative and poetic prose

Professors

Mr. Olmo Cuevas, Víctor

- Co-Founder, Game Designer and Game Economist at Seven Moons Studios Blockchain Gaming
- Web designer and professional video game player
- Professional Online Poker Player and Teacher
- Graphic Designer at Arvato Services Bertelsmann
- Project Analyst and Investor at Crypto Play to Earn Gaming Scene
- Chemical laboratory technician

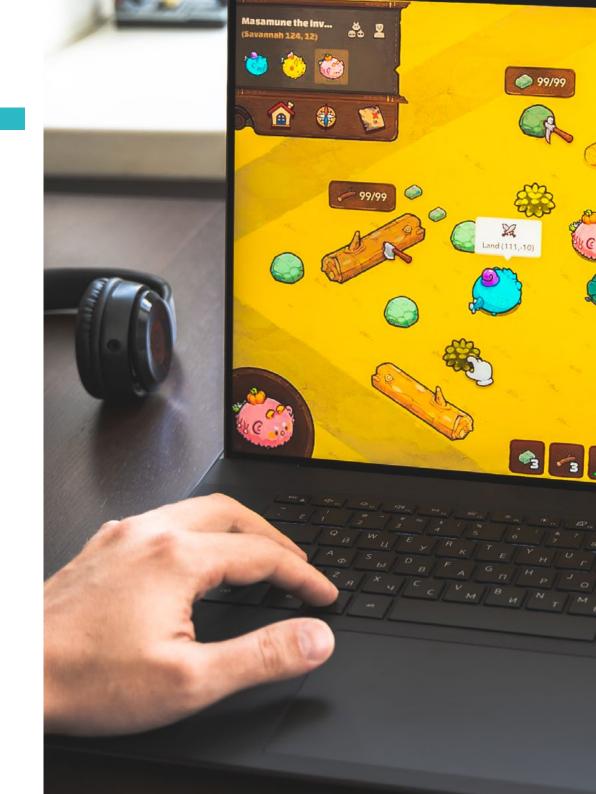

tech 20 | Structure and Content

Module 1. NFT

- 1.1. NFT
 - 1.1.1. NFTs
 - 1.1.2. NFT Linkage and Blockchain
 - 1.1.3. Creation of NFT
- 1.2. Creating an NFT
 - 1.2.1. Design and Content
 - 1.2.2. Generation
 - 1.2.3. Metadata and Freeze Metada
- 1.3. NFT Sales Options in Gamified Economies
 - 1.3.1. Direct Sales
 - 1.3.2. Auction
 - 1.3.3. Whitelist
- 1.4. NFT Market Research
 - 1.4.1. Opensea
 - 1.4.2. Immutable Marketplace
 - 1.4.3. Gemini
- 1.5. NFT Monetization Strategies in Gamified Economies
 - 1.5.1. Value in Use
 - 1.5.2. Aesthetic Value
 - 1.5.3. Actual Value
- 1.6. NFT Monetization Strategies in Gamified Economies: Mining
 - 1.6.1. NFT Mined
 - 1.6.2. Merge
 - 1.6.3. Burn

Structure and Content | 21 tech

- 1.7. NFT Monetization Strategies in Gamified Economies: Consumables
 - 1.7.1. NFT Consumable
 - 1.7.2. NFT Envelopes
 - 1.7.3. Quality of NFT
- 1.8. Analysis of Gamified Systems Based on NFT
 - 1.8.1. Alien Worlds
 - 1.8.2. Gods Unchained
 - 1.8.3. R-Planet
- 1.9. NFT as an Investment and Labor Incentive
 - 1.9.1. Investment Participation Privileges
 - 1.9.2. Collections Linked to Specific Dissemination Work
 - 1.9.3. Sum of Forces
- 1.10. Areas of Innovation in Development
 - 1.10.1. Music at NFT
 - 1.10.2. NFT Video
 - 1.10.3. NFT Books

A program designed and conceived to make a qualitative leap in your professional career"

tech 24 | Methodology

Case Study to contextualize all content

Our program offers a revolutionary approach to developing skills and knowledge. Our goal is to strengthen skills in a changing, competitive, and highly demanding environment.

At TECH, you will experience a learning methodology that is shaking the foundations of traditional universities around the world"

You will have access to a learning system based on repetition, with natural and progressive teaching throughout the entire syllabus.

The student will learn to solve complex situations in real business environments through collaborative activities and real cases.

A learning method that is different and innovative

This TECH program is an intensive educational program, created from scratch, which presents the most demanding challenges and decisions in this field, both nationally and internationally. This methodology promotes personal and professional growth, representing a significant step towards success. The case method, a technique that lays the foundation for this content, ensures that the most current economic, social and professional reality is taken into account.

Our program prepares you to face new challenges in uncertain environments and achieve success in your career"

The case method has been the most widely used learning system among the world's leading business schools for as long as they have existed. The case method was developed in 1912 so that law students would not only learn the law based on theoretical content. It consisted of presenting students with real-life, complex situations for them to make informed decisions and value judgments on how to resolve them. In 1924, Harvard adopted it as a standard teaching method.

What should a professional do in a given situation? This is the question that you are presented with in the case method, an action-oriented learning method. Over the course of 4 years, you will be presented with multiple practical case studies. You will have to combine all your knowledge, and research, argue, and defend your ideas and decisions.

Relearning Methodology

TECH effectively combines the Case Study methodology with a 100% online learning system based on repetition, which combines 8 different teaching elements in each lesson.

We enhance the Case Study with the best 100% online teaching method: Relearning.

In 2019, we obtained the best learning results of all online universities in the world.

At TECH you will learn using a cutting-edge methodology designed to train the executives of the future. This method, at the forefront of international teaching, is called Relearning.

Our university is the only one in the world authorized to employ this successful method. In 2019, we managed to improve our students' overall satisfaction levels (teaching quality, quality of materials, course structure, objectives...) based on the best online university indicators.

Methodology | 27 tech

In our program, learning is not a linear process, but rather a spiral (learn, unlearn, forget, and re-learn). Therefore, we combine each of these elements concentrically.

This methodology has trained more than 650,000 university graduates with unprecedented success in fields as diverse as biochemistry, genetics, surgery, international law, management skills, sports science, philosophy, law, engineering, journalism, history, and financial markets and instruments. All this in a highly demanding environment, where the students have a strong socio-economic profile and an average age of 43.5 years.

Relearning will allow you to learn with less effort and better performance, involving you more in your training, developing a critical mindset, defending arguments, and contrasting opinions: a direct equation for success.

From the latest scientific evidence in the field of neuroscience, not only do we know how to organize information, ideas, images and memories, but we know that the place and context where we have learned something is fundamental for us to be able to remember it and store it in the hippocampus, to retain it in our long-term memory.

In this way, and in what is called neurocognitive context-dependent e-learning, the different elements in our program are connected to the context where the individual carries out their professional activity.

This program offers the best educational material, prepared with professionals in mind:

Study Material

All teaching material is produced by the specialists who teach the course, specifically for the course, so that the teaching content is highly specific and precise.

These contents are then applied to the audiovisual format, to create the TECH online working method. All this, with the latest techniques that offer high quality pieces in each and every one of the materials that are made available to the student.

Classes

There is scientific evidence suggesting that observing third-party experts can be useful.

Learning from an Expert strengthens knowledge and memory, and generates confidence in future difficult decisions.

Practising Skills and Abilities

They will carry out activities to develop specific skills and abilities in each subject area. Exercises and activities to acquire and develop the skills and abilities that a specialist needs to develop in the context of the globalization we live in.

Additional Reading

Recent articles, consensus documents and international guidelines, among others. In TECH's virtual library, students will have access to everything they need to complete their course.

Students will complete a selection of the best case studies chosen specifically for this program. Cases that are presented, analyzed, and supervised by the best specialists in the world.

Interactive Summaries

The TECH team presents the contents attractively and dynamically in multimedia lessons that include audio, videos, images, diagrams, and concept maps in order to reinforce knowledge.

This exclusive educational system for presenting multimedia content was awarded by Microsoft as a "European Success Story".

Testing & Retesting

We periodically evaluate and re-evaluate students' knowledge throughout the program, through assessment and self-assessment activities and exercises, so that they can see how they are achieving their goals.

tech 32 | Certificate

This program will allow you to obtain your **Postgraduate Certificate in NFT and Gamified Economies** endorsed by **TECH Global University**, the world's largest online university.

TECH Global University is an official European University publicly recognized by the Government of Andorra (*official bulletin*). Andorra is part of the European Higher Education Area (EHEA) since 2003. The EHEA is an initiative promoted by the European Union that aims to organize the international training framework and harmonize the higher education systems of the member countries of this space. The project promotes common values, the implementation of collaborative tools and strengthening its quality assurance mechanisms to enhance collaboration and mobility among students, researchers and academics.

This **TECH Global University** title is a European program of continuing education and professional updating that guarantees the acquisition of competencies in its area of knowledge, providing a high curricular value to the student who completes the program.

Title: Postgraduate Certificate in NFT and Gamified Economies

Modality: online

Duration: 6 weeks

Accreditation: 6 ECTS

Mr./Ms. _____, with identification document _____ has successfully passed and obtained the title of:

Postgraduate Certificate in NFT and Gamified Economies

This is a program of 180 hours of duration equivalent to 6 ECTS, with a start date of dd/mm/yyyy and an end date of dd/mm/yyyy.

TECH Global University is a university officially recognized by the Government of Andorra on the 31st of January of 2024, which belongs to the European Higher Education Area (EHEA).
